WYOMING ACUPUNCTURE SOCIETY needs your help! Currently, there are no laws regulating acupuncture in the state of Wyoming. The Wyoming Acupuncture Society is a group of acupuncturists in Wyoming working to push a bill through in the legislative session in early 2017. We also welcome any support you may be able to give us. Advocacy from patients, friends & family is crucial for our success.

5 Reasons to Regulate Acupuncture in Wyoming:

1. To ensure the health and safety of Wyoming's residents.
2. To more effectively manage pain, increase quality of life and reduce opiate use.
3. To increase economic growth through jobs in the number-one growing industry: healthcare.
4. To increase accessibility. Regulation will expand health insurance coverage and attract more qualified practitioners to our state.
5. Regulated acupuncture easily integrates with conventional medicine and hospitals.
